Students should spend between 45 and 90 minutes completing home study each night. Home study tasks will be set on the days outlined above whenever possible. All homework will be uploaded onto Show My Homework. Where subjects have two home study days in a week, the teacher may prefer to set one longer home study task. In this case, students should ensure they spend enough time on it (45 – 60 minutes). Forty five minutes home study per night is an absolute minimum for all students.
